Art Unit: 1617

Claims 17-37 are pending in this application which is a continuation of application SN 09/795,073, now US Patent 6,586,367, which is a continuation of 09/242,658, abandoned, which is a Continued Prosecution Application (CPA) which has been filed under 35 USC 371 as a national stage application of PCT/EP97/04795, filed September 3, 1997.

Applicants' claims are drawn to a process for the control of weeds in phospho-herbicide resistant crops, by applying compositions comprising a phospho-herbicide (glufosinate or glyphosate) and a synergistic amount of another herbicide (prosulfuron, primisulfuron, dicamba, pyridate, dimethenamid, metolachlor, propaquizafop, atrazine, terbutylazine). All of the active components are described as being known (page 1). The combination of either glufosinate or glyphosate with some of the second herbicides (metolachlor, atrazine, dicamba, dimethenamid) has also been disclosed (pages 6-7); thus the method claims are drafted with proviso statements to exclude this material.

Formulation examples are provided in the specification. The data presented in the five declarations in the parent application demonstrated unexpected crop antagonistic effects of the herbicidal combinations in glufosinate or glyphosate tolerant crops.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1617

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 17-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,586,367. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are narrower in scope; some of the herbicides listed in claim 1 of the patent have been deleted from the Markush group of claim 17 herein.

No claims are allowed.
